

Exclusive Offer

The new B2 with a smart cabinet or EV charger and energy analysis of your construction site.

To mark the launch of the new B2 battery, Bright offers a select group of contractors an exclusive opportunity. Benefit from a significantly reduced purchase price on the B2 unit, receive a complimentary smart cabinet or EV charger, and gain valuable insights with a tailored energy analysis for your construction site.

B2 Battery Unit

New

The new B2 — the most powerful and versatile battery unit for construction sites.

- ✓ Pays for itself through grid imbalance
- ✓ Intelligent integration with generator
- ✓ Optimal grid: power factor, phase balancing.

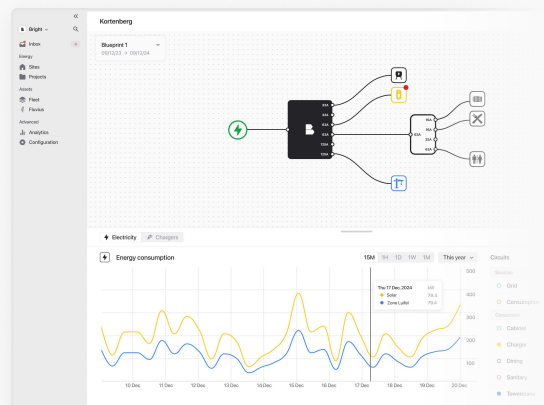

+

Energy Platform

The complete energy management tool for planning, monitoring and controlling the energy on your construction site.

- ✓ Easily create your energy plan
- ✓ Live monitoring and visualization
- ✓ Manage settings and reporting

Smart Cabinet

Free

The smart electric cabinet that provides detailed insight, eliminates excess consumption and saves cost.

- ✓ Monitoring
- ✓ Smart timers
- ✓ Live status

Smart EV charger

Free

The mobile charging solution that enables EV charging on construction sites with limited grid.

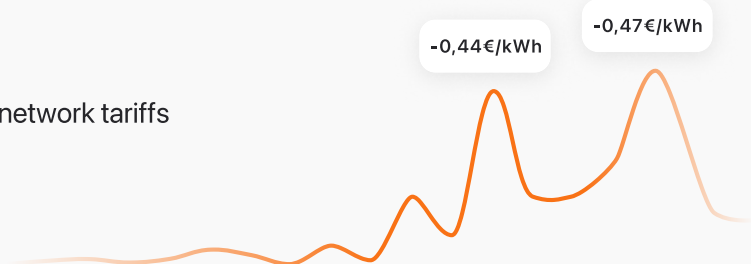

- ✓ Load balancing
- ✓ Priority based charging
- ✓ Optimised consumption

Energy Analysis

Included

During the first 3 months of your construction site, a comprehensive energy analysis is conducted based on collected data. This analysis reveals exact savings, returns, and the payback period of your investment.

- ✓ Gains from grid imbalance and network tariffs
- ✓ Savings through smart timers
- ✓ Savings in diesel consumption
